

Declaration letter

February 20th, 2017

This letter states that there is no change in the design, circuitry or construction and the original test results performed on the VN210 Radio Module continue to be representative and applicable to the equipment. The VN210 modular transmitter is limited to installation in Control Data Systems products only and thus retaining control over the final installation of the device.

Description of minor cosmetic differences:

1. The FCC ID label has been modified and enlarged. Also, the FCC ID differs from the previous VN210(SQB-NIVISMOD003).

For additional information please contact Adrian Vatamanu.

Sincerely,

Adrian Vatamanu

Hardware Engineer

Control Data Systems
